Hi Gary and Sherry,

I have not heard back from the Tribe regarding their availability to participate in a conference call today. Thank you for being prepared to take the call. We'll see if we can schedule the call for next week. Have a good weekend.

Michael D. Harris

Good morning Gary and Sherry,

As we discussed yesterday, please ensure our technical staff are ready to participate in a possible conference call today with the Tribe. We should be ready to take notes and summarize the call in writing. I will let you know as soon as I hear from them. Please let know if you have any questions. Thank you.

Dear President Wildcat:

Thank you for your email of September 20th and I want to respond to the concerns you raised.

The Draft Work Plan for the Tower Standard Pilot Study that I sent in my September 19th and September 20th emails is the same document with no edits or corrections from EPA. That is the Work Plan for which we requested technical comments from the Tribe. Due to the timing of our activities, we are reviewing the Work Plan concurrently with the Tribe.

Per your email of September 20th, I will schedule a conference call, preferably Friday, September 22nd before your Tribal Council meeting to discuss technical comments. Please let me know a time that is convenient for us to have this conference call.

After discussing your technical comments, EPA will direct our contractor to finalize the Work Plan. In addition, our contractor will draft a Pilot Test Plan. We expect a draft of the Pilot Test Plan to be available the week of September 25th and will share it with the Tribe for review. While you are welcome to invite your contractor to attend the conference call on the Work Plan, only EPA staff will be present.

Thank you for letting me know that the Tribe has obtained an access agreement with Ms. Sundberg. As Bob Kaplan noted in his letter to you of September 20th, EPA cannot obtain access for other governmental entities and it is EPA's practice to negotiate and obtain access directly from the property owner for conducting any federal activities. Thus we cannot access the site as your invitee and your access agreement with Ms. Sundberg cannot cover federal activities.

In Larry Wawronowicz' email of September 20th, the Tribe requested a copy of the Statement of Work that EPA had provided to Tetra Tech for this project, maps showing locations of proposed excavation, wells, and other technical materials provided to Tetra Tech. In response, I have attached to this email a copy of the requested Statement of Work and two very preliminary maps. Detailed maps have not yet been developed. Please understand that these preliminary maps are subject to change based on a number of matters that are still being reviewed, such as access limitations and possible DOT restrictions near the highway. As more detailed maps are created, we will share them with you.

Other technical materials relevant to this project are available on the web site for the Tower Standard Cleanup and is found at

https://response.epa.gov/site/site_profile.aspx?site_id=11760

If you have any questions, please do not hesitate to contact me.

Thank you.
